

Careers in Germany with Fraunhofer

Are you a researcher, PhD candidate or student from Brazil who is interested in working in Germany? Fraunhofer might be just the employer you are looking for!

The Fraunhofer-Gesellschaft is the world's leading organization for applied research. Over 30,000 employees in over 70 institutes and research units are working in some of the most innovative RnD projects in Germany and worldwide.

PhD candidates

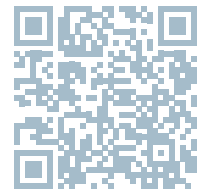

The Fraunhofer institutes work in close collaboration with German universities on location to give their research fellows the opportunity to achieve a doctorate degree. Would you like to be one of them? Find out more about the process to become one! Are you already enrolled in a Brazilian university's PhD program? There are many ways for you to do research at a Fraunhofer institute, too.

Postdocs and experienced professionals

If you just finished your doctorate and are looking for a challenging, lucrative career outside of Brazil, or if you are an experienced professional who wants to participate in international research projects – Fraunhofer offers great perspectives for you!

Students and interns

You are a university student in a STEM subject? You want to take charge of your own career as early as possible? Congratulations, you came to the right place! The Fraunhofer institutes work in close collaboration with German universities on location to enable students to gain some practical experience from the very start, even before achieving any degree.
